Ranem Hosny Alawady

Front-End Developer

Mansoura | 01025666243 | ranemhosni2001@gmail.com | GitHub:/Ranem-Hosny |
LinkedIn: https://www.linkedin.com/in/ranem-hosny/

PROFILE

Front-End Developer experienced in building web applications using **React.js**. Graduate of **ITI** and **Digital Egypt Pioneers Initiative (DEPI)**, with hands-on experience working on real projects within development teams. Seeking continuous learning and growth in a professional work environment

EDUCATION

Faculty of Delta Higher Institute for Computers and Information System **2019 - 2023**
Bachelor's Degree in Management Information Systems – with Excellent Grade

EXPERIENCE

Front-End Developer (Angular) at SoftZone Company | Full-time **Nov 2024 – Jul 2025**
Key Responsibilities:

- Developed and maintained responsive and dynamic web applications using Angular
- Handled Ui implementation based on Zeplin designs, ensuring pixel-perfect accuracy
- Fixed layout and responsiveness issues across different browsers and screen sizes
- Upgraded Angular projects to version 17, resolving compatibility and dependency issues

INTERNSHIP

Front-End & Cross Platform Mobile Development at Information Technology Institute (ITI) | Intensive Training Program | Mansoura Branch **Jul 2025 - Present**
Gaining hands-on experience in building responsive web and mobile applications using modern front-end technologies. Working with frameworks like React and React Native, focusing on UI/UX best practices, APi integration, and clean code structure.

Front-End Development with Angular at Egypt Digital Pioneers Initiative **Apr 2024 – Oct 2024**
Completed intensive training covering modern front-end technologies including HTML5, CSS3, JavaScript, TypeScript, Bootstrap, and Angular. Gained solid understanding of UX/Ui principles, clean code practices, Git/GitHub usage, and documentation standards.
Also completed the Business English Track in collaboration with OTO Courses, focusing on professional

COURSES

Front-End Development with Angular at Route Academy | selfstudy **Apr 2025 – May 2025**
Gained practical knowledge in modern Angular development, including data binding, routing, dependency injection, and APi integration. Focused on building scalable applications using standalone components, lazy loading, reactive forms, and form validation techniques.

Front-End Development with React at New Horizons | 90 Hours **Dec 2023**
Experienced in building responsive and interactive web interfaces using HTML5, CSS3, JavaScript, and React.js. Skilled in creating modern animations with Animate.css and designing mobile-friendly layouts with Bootstrap.

PROJECTS

atc
During my time at SoftZone Company, contributed to ATC, a Saudi e-learning platform built with Angular. fixed Ui issues, created new responsive pages, and upgraded the project from Angular 15 to Angular 18 to improve performance and stability.

naQaa
platform that opens a gateway for sellers to showcase their 100% organic products, with guaranteed quality and certification for each item.
The platform allows users to explore and purchase natural products safely and easily.
It is designed to provide a smooth, attractive, and dynamic user experience.
The project is developed using React and Firebase, focusing on performance, security, and efficient data management.

Hr System
As part of a team project at (ITI), we developed an HR System using HTML, CSS, and JavaScript. The system manages employee data, including adding, editing, and deleting records, with form validation and confirmation alerts. This project improved my teamwork, problem-solving, and front-end development skills.

Postify
As part of my training at (ITI), developed POSTIFY, a blogging web app built with React.js. The application allows users to create, edit, and delete posts, with authentication handled using JSON Server Auth. This project strengthened my skills in component-based development, state management, and APi integration.

YUMMYGO
Developed YUMMYGO, a responsive restaurant web app built with React.js, featuring filtering, sorting, pagination, search functionality, and user login. This project showcased my ability to build rich Ui experiences, handle state and data management, and implement user authentication.

Graduation Project
Order Tracking Website Using GPS: A web app built with **JavaScript** that allows users to track delivery orders in real-time using **GPS** and view live updates on an interactive map.

TECHNICAL SKILLS

HTML5 | CSS3 | JavaScript | TypeScript | React.js | Angular | Form Handling (Formik, Zod)
SCSS | Tailwind CSS | Angular Material | Animate.css | Bootstrap| Agile tools
Figma |Git | GitHub | Responsive Design | RESTful APIs | Authentication | Code Optimization | Debugging

SOFT SKILLS

Presentation Skills | Communication Skills | Time Management

Language

Arabic (Native) English (B1)
